Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-67 are rejected under 35 U.S.C. 102(e) as being anticipated by Wylie et al., U.S. 2004/0149431.

Regarding claim 1-67, Wylie et al. discloses recording and displaying means for (0146) generating a summary of a drillstring in each hole section in response to data (0167), generating a diameter of the first and second drill collar (0124) with respect to the drift diameter, generating an outer diameter of a heavy drillstring for various sized boreholes (0021,0022), generating weight on the bit (0258), first collar or section (324) and second collar (318) of the drill string, generating lengths for the first and second collars or sections (0257), determining tension (0426), cost (0225) and kick tolerance (0213).

Response to Arguments

Applicant's arguments filed 18 September 2006 have been fully considered but they are not persuasive.

Applicant's argue the prior art does not disclose generation of a summary in response to input data, including wellbore geometry and trajectory requirements.

The prior art discloses in paragraph 0167 input including requirements of the well plan to reach a target location.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Huang G.B. 2,367,843 discloses a similar method.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
